QuaRK test error against N (paper Fig. 4), ridge chosen on validation data; thin lines are seeds
paper-accurate settings, 5 seeds (12345 is the authors' data)
Normalized test MSE (log scale)
10^{0}
10^{-1}
10^{-2}
10^{2}
10^{3}
10^{4}
Number of training windows N (log scale)
Volterra: slope -0.09
Exponential fading: slope -0.09
Current-point readout: slope -0.46
slope -0.5 (1/√N)
